Factors affecting the Group's business and profit during the reporting period:

Net profit recorded decrease during the Reporting Period was mainly because revenue from venture capital platforms in which we withdrawn investment during the Period decreased when compared with the corresponding period of last year, resulting in the decrease in the Company's investment gains for the current period as compared with the corresponding period of last year; The primary reason for the decrease in the net cash flows from operating activities was the increase in the payment for gas purchases settled by the Company's gas-fired enterprises in the first half of 2018 as compared with the corresponding period of last year.

Major performance drivers: With the continuing urbanization, continuous inflow of urban population, tighter environmental regulatory policies and continuous enhancement of environmental protection standards, each wastewater treatment plants continuously carried out renovation in response to the government's requirements and actively increased their capacity. The municipal governments would procure service from such companies in public procurement model, and make payment according to actual processing amount and the unit service price approved by local financial bureau,construction bureau and water authorities.

(3) Urban transportation

The transportation service business of the Company mainly focused on the comprehensive transportation, which is operated by Dazhong Transportation, a subsidiary of the Company. It mainly primarily engages in the development of taxi operation, car rental and other market segments, and provides comprehensive transportation and ancillary services such as taxi, car rental, service, logistics and tourism. Dazhong Transportation has over ten thousands vehicles, including taxi, rental car, logistics vehicles and tourist bus, among which the number of taxi representing around 17% of the total number of taxi in Shanghai city.

The taxi operation business of Dazhong Transportation is mainly under subcontraction in Shanghai and mainly under rental and callings of cars outside Shanghai. At the same time, in response to the effects of internet model on traditional taxi industry, leveraging on the advantage of Dazhong brand, Dazhong Transportation launched the "Dazhong Chuxing" (大眾出行) platform to provide regular online car hailing services. The car rental business of Dazhong Transportation mainly includes long term and short term rent. Under the operation model, the Company will purchase vehicles and licenses and provide external car rental service in an integrated way.

Major performance drivers: The Company put great efforts in the development of corporate car rental segment in urban transportation business, actively explored the "+ Internet" model in traditional taxi industry, and became the first taxi company in China which obtained the legal and compliant qualification for operation of online car hailing platform, so as to improve its ability in provision of comprehensive urban transportation services.

(4) Infrastructure investment and operation

The current infrastructure investment project operated by the Company is the Xiangyin Road tunnel in Shanghai invested, constructed and operated under BOT arrangement. The Company provides operation maintenance and protection services for the project, and the Shanghai government provides ongoing special subsidy to the Company as investment payback and return.

Major performance drivers: The Company further increases its revenue through continuous improvement of project management standard to seek new infrastructure investment projects.

2. Financial Venture Capital Business

(1) Financial services

During the Reporting Period, the Company wholly owned or majority owned a number of financial service companies of different types, which are mainly engaged in financial leasing, pre-paid cards and etc. Financial leasing is an important complement of traditional banking facilities and equity financing as well as an effective link between SMEs in real economy and financial industry; the Company's pre-paid cards business of "Dazhong e-Card (大众e通卡)" covers consumption scenarios of basic necessities of life and online shopping, which provides convenience to the daily payment.

Major performance drivers: The Company strengthens its ability to observe and extrapolate the industry development trend. Besides, the Company continuously improves the financial service standards and identifies quality customers to improve its profitability.

(2) Venture capital business

The venture capital business of the Company is mainly classified as investments in venture capital enterprises and direct investments. There are three major venture capital platforms invested by the Company, which are Shenzhen Capital, Shanghai Huacan Equity Investment Fund Partnership (Limited Partnership) and Shanghai Xingye Venture Capital Co., Ltd.

Major performance drivers: The Company increases the revenue from venture capital business by strengthening the investment, management and exit ability of platform companies and funds, while enhancing the ability of its internal investment team, making adjustments to its pace of investment, making judicious decision and implementing risk control to improve the profitability of direct investment business.

1. Gas Industry

During the first half of 2018, the development environment for the natural gas industry has picked up, demonstrated by its fast increase of the supply and consumption. Meanwhile,

On May 25, 2018, the NDRC announced the "Circular on Straightening the Gas Station Price of Natural Gas Used for Residential Purpose (《關於理順居民用氣門站價格的通知》)", which requires that the administration of the price shall be changed from the administration at the highest station price to the administration at the benchmark station price, with the price determined with reference to the benchmark station price of gas used by non-residential consumers, and the supplier and purchaser can determine the specific station price through negotiation based on the benchmark station price within the range of upward adjustment of 20% and unlimited downward adjustment to be in line with the mechanism for the price of the gas used by non-residential consumers. Meanwhile, the seasonal price difference policy has been implemented to form a seasonal price difference system that sensitively reflects hasnis5(ng)0.esusedierydddhirefl3.214 impwaheco[(k)7.etison of thenral Gas usece of acrosse seaial rm t(linen lothun. The 13th Five-Year Plan induces a huge room for water treatment, and the urban and rural wastewater treatment markets will focus on different development directions. At present, the ratio of national urban wastewater treatment is almost saturated, which is very close to the target of 13th Five-Year Plan of 9 5%. The key focus on urban wastewater treatment has changed from "quantity" to "quality". The estimated total investment of urban wastewater treatment during 13th Five-Year period was RMB 564.4 billion, among which, the investment of construction and renovation of sewer system was totally RMB312.9 billion, accounted for 55.44%, and investment of the upgrading and reconstruction of wastewater treatment facilities reached to RMB43.2 billion. It is found that key focus on urban wastewater treatment of the government is to phase out backward production capacities and i Tuces asaci manageroom fe ratiblocuckent, 23qnkyhe urba 5atment has

3. *Urban Transportation Industry*

In 2018, car rental segment remain depressed as policy barriers were still unbroken and hindered the establishment of the market mechanism for transportation price. Although administrative measures on online taxi had been successively implemented in cities and brought improvement to an orderly market, there were still many platforms engaged in illegal operation. As a result, car rental segment in 2018 still face dual challenges from labour resource and operational efficiency.

At the 2018 National Transportation Work Conference, 12 major tasks was proposed, which includes but not limited to deepening the supply-side structural reform, accelerating the building of a modern comprehensive transportation system, speeding up the development of innovative transportation industry and accelerating the development of green transportation. According to the Reply from the State Council in respect of the Development of Shanghai under Master Plan for Shanghai City (《國務院關於上海市城市總體規劃的批復》

"Dazhong" is a well-known trademark in Shanghai with a strong intangible asset advantage in public utility industry with wide customer base and brand recognition. "Dazhong" is a brand approved for use in 1994. Since 1999, the "Dazhong" trademark has been recognized as a famous trademark in Shanghai for six consecutive years. "Dazhong" 's core brands, namely "Dazhong Taxi", "Dazhong Gas", "Dazhong Lease" and "Dazhong Logistics" maintain the market leading positions in terms of market share and operating results. "Dazhong" brand is a leading brand in the public utility industry and has become the highlighted advantage of core competitiveness of the enterprise, laying solid foundation for "Dazhong" to become a centuries-old enterprise. To maintain the influence of "Dazhong" brand in the market, the Company continues to strengthen its brand influence and market competitiveness by continuously improving service quality.

( )

Shanghai had a gross domestic product of approximately RMB3,013.3 billion in 2017, representing an increase of 9.71% as compared with last year, which ranked first among all cities in China. As a major public utility service provider in Shanghai with a long-established and prominent brand, the Company has contributed to, and benefit from, the exponential economic growth of Shanghai in the last three decades. In 1991, the Company established taxi operations in Shanghai. Since 2001, the Company made the conversion of piped gas delivery infrastructure from coal gas to natural gas in Shanghai. The Company further expanded its public utility business into wastewater treatment and the public infrastructure industries since 2003. These projects are part of public welfare and economic development plans implemented by the Shanghai government, which have brought significant social benefits to the local residents and enhanced the Company's brand image. The success of the Company's public utility operations in Shanghai served as a foundation for further expansion of its operations. The Company's extensive operational experience enabled it to expand and quickly ramp up its operations in Eastern China. The Company believes it is well-positioned to leverage its leading industry position and market reputation in Shanghai to continue to capitalize on the future development of Shanghai.

( )

The public utility industry is closely related to the daily life of residents, therefore, it will not be highly affected by economic cycle. During the economic adjustment period, the capital market will usually regard public utility industry as an industry with higher defensiveness. The Company also engages in gas business, urban transportation business, sewage treatment and municipal construction business, as they may involve laying of pipeline network or national economy and people's livelihood as well as operation and development of cities, it is regarded as monopolistic and irreplaceable.

The Company has been engaging in public utility industry for more than 20 years, and it has accumulated extensive experience in operation and management. Its management members and talents are professional and experienced, thus providing strong guarantee for the Company's

2018 was the second year for the Company to become an A+H listed company and also a key year for the Company to steadily develop into a new stage. By adhering to the development strategy of "simultaneous development of public utility and financial investment", the Company paid attention to public utility investment, based on enhancing and upgrading internal management level, oriented at optimizing outbound investment project and took advantages from centralized capital use benefit, so as to continuously advance the implementation of various key works such as the completion of new projects for primary public utility business, optimization of outbound investment project model, enrichment of financing channels and capital intensive management.

During the Reporting Period, the Company recorded a total revenue of RMB2,689,753 thousand, increasing by 8.44% as compared to the corresponding period of last year. Net profit attributable to equity holders of listed company was RMB126,065 thousand, decreasing by 37.82% as compared to the corresponding period of last year.

1. The subsidiary of the Company, Dazhong Transportation, has responded actively to fierce market competition. It constantly adapts to new requirements proposed by investment upgrade and

3. Projects in the environment and infrastructure segment are all under stable operation. In the first half of 2018, the construction and competition inspection of Jiading sewage plant major upgrading project which commenced in April 2017 has been completed, after which the plant has formally started to operate under A+ standard and its sewage treatment quality have both improved significantly. In the first half of 2018, Jiangsu Dazhong Water has attached significant importance to compliance governance, viewing discharging standard as enterprise lifeline, cost control as the key to improve the Company's operating efficiency and project development as the most important approach to expand its scale. Under the keen competition, Jiangsu Dazhong has successfully won the bid for Xuzhou Qingshanquan sewage plant project. Xiangyin Road tunnel project operated with high efficiency and recorded stable concession income.

4. As for financial investment segment, in the first half of 2018, Dazhong Financial Leasing further improved the standard for identifying potential customers and leveraging its leading position in the industry, strived to enhance its continuous marketing activities towards high quality customers. With such efforts, incremental investment and revenue of Dazhong Financial Leasing both hit record high and it has formally connected to the credit system of the People's Bank of China (the "PBOC"). Dazhong Commerce actively implemented various requirements from the PBOC and Payment & Clearing Association of China, and in doing so, it promoted stable increase of sales, developed withholding business, improved the performance of e-commerce platform, explored acceptance market and promoted technology development and product upgrading. In the first half of 2018, investment platforms and projects in which the Company invests or holds equity interests all reported satisfactory performance and for some of them, the Company has completed equity transfer and investment exit.

5. We strengthened our financial and fund management. During the first half of 2018, the Company continuously promoted the improvement of its overall financial and fund management by actively pushing forward the construction of fund pool to establish a unified fund management system and enhancing the supervision on the revenue and expenditure to use fund more efficiently. The Company achieved breakthroughs in credit rating. The credit rating of the Company has been improved from AA+ to AAA together with a stable rating outlook. The credit rating of various bonds issued by the Company also has been improved from AA+ to AAA.

6. We actively pushed forward informatization construction to optimize the Company's strategic management and control. During the first half of 2018, the Company carried forward its informatization construction guided by two principles of "strategic synergy" and "strategic management and control". In order to build a "big data" application and analysis platform, the phrase I of the ECC Project (Enterprise Centralized Control Center Construction Project) has been launched, which achieved a display function for the Company's core business and the infrastructure construction for the Company's core data analysis and decision making. Leveraging on the advanced "cloud services" technology, an enterprise-level cloud coordination mobile portal has been used across the Company to further consummate the Company's informationized strategic management and control. The Company has preliminarily achieved the platformization of its business system and the integration of business and finance. The Company also further optimized the information system for the labor cost's budgets and final accounts of the Company, its wholly-owned and holding subsidiaries.

7. We strengthened safety awareness and enhanced safe management level. The Company attached great emphasis on safe production by upholding a principle of "Safety First, Focusing on Prevention and Comprehensive Management" and establishing a sound system of responsibility in safe production. In the first half of 2018, under the guidance of the Company's steering group on safety production, the Company signed the letter of responsibility for safety production of the year with its subsidiaries during the first half of this year to supervise and urge subsidiaries to conduct self-checking and correction work, thus no incidents of safety production occurred during the first half of 2018.

1. *Risk of pricing policies*

The public utility business we engaged in focuses on both economic benefits and social welfare. The development and profit level of these businesses are subject to certain policy risks. The governments pricing model and pricing mechanism for gas price, wastewater treatment price and city taxi transportation price may affect the profitability of the Company

2. *Risk of raw material price fluctuation*

As a public utility enterprise, the Company has mass consumption of raw material in urban gas supply and environment and municipal infrastructure sectors, which is an important part of the operation cost of the Company, including gas sources, chemical agents and electricity. The supply and price of which would be affected by prevailing domestic and overseas market conditions and pricing policies of relevant authorities. The operation cost of the Company would be raised when the market volatility or change to policies occurred.

3. *Risk of financial credit*

If any individual and corporate customers are, subjectively or objectively, not able to perform their contractual obligations or responsibilities, the operating results, financial position and profitability of Company's proprietary financial service business (including finance leasing) may be adversely affected.

4. *Investment risk of financial investment business*

The Company adheres to the corporate development strategy of "simultaneous development of public utility and financial investment (公用事業和金融創投齊頭並進)" and actively promotes the financial investment business. As venture capital business is inherently

5. *Risk of overseas investment and exchange rate fluctuation*

The risk of overseas investment refers to the risks objectively existed, yet hard to be identified in advance in overseas investment environment for a certain period of time, which may lead to a loss and then failure in overseas investment, including political risk, cultural risk and market risk. Affected by domestic and foreign economic, political situations as well as the supply and demand of currencies, the exchange rates of RMB against other currencies in the future may be greatly different from the prevailing exchange rates, which would have

**Notes: For identification purpose only*

In the first half of 2018, Dazhong Gas purchased piped gas from Shanghai Gas Group in its ordinary course of business at the total consideration of RMB1,729 million.

On December 16, 2015, Dazhong Gas entered into a framework gas purchase agreement (the "Framework Agreement") and a supplemental agreement (the "Supplemental Agreement", together with the Framework Agreement, the "Master Gas Purchase Agreements") with Shanghai Gas Group in connection with the purchase of piped gas, pursuant to which the parties confirmed and agreed on the expected annual supply volume of piped gas and other volume based parameters each year. The Framework Agreement has a term of 20 years from January 1, 2014 to December 31, 2033. The Supplemental Agreement has a term from December 16, 2015 until December 31, 2018.

Based on the Master Gas Purchase Agreements, the consideration paid to Shanghai Gas Group for the purchase of piped gas are subject to an annual cap of RMB2,600 million, RMB2,660 million and RMB2,720 million for the three years ending December 31, 2016, 2017 and 2018, respectively. Since it is difficult to estimate the piped gas consumption over an extended period, according to the Framework Agreement and in line with the normal business practice in piped gas supply industry in Shanghai, additional five-year annual plans for the amount of piped gas to be supplied in the future shall be further agreed between the parties before December 31, 2018, 2023 and 2028, respectively. According to the relevant PRC laws and regulations, the price of the piped gas purchased by the Group from Shanghai Gas Group is fixed by the relevant local competent authorities. As Shanghai Gas Group is a substantial shareholder of the Company, it is a connected person of the Company pursuant to Rule 14A.07(1) of the Hong Kong Listing Rules. The purchase of piped gas by Dazhong Gas from Shanghai Gas Group constitutes continuing connected transactions of the Group upon Listing.

On May 25, 2017, Dazhong Jiading Sewage, a wholly-owned subsidiary of the Company, and Dazhong Financial Leasing, a non-wholly owned subsidiary of the Company, entered into a title transfer agreement I ("Title Transfer Agreement I"), pursuant to which Dazhong Jiading Sewage agreed to sell certain asset ("Asset I") to Dazhong Financial Leasing at a consideration of RMB150 million (equivalent to approximately HK$168 million). On the same date, Dazhong Jiading Sewage and Dazhong Financial Leasing entered into a leaseback contract I ("Leaseback Contract I") (Title Transfer Agreement I together with the Leaseback Contract I, "After-Sale Leaseback I"), pursuant to which Dazhong Financial Leasing agreed to leaseback Asset I to Dazhong Jiading Sewage during the lease period. Upon expiry of the lease period and subject to full performance of its obligations by Dazhong Jiading Sewage under the Leaseback Contract I, Dazhong Financial Leasing shall transfer the title of Asset I back to Dazhong Jiading Sewage or any third party as designated by Dazhong Jiading Sewage at a nominal price of RMB100.

Pursuant to the Leaseback Contract I, Asset I shall be leased back to Dazhong Jiading Sewagee during the lease period at the total rents of RMB163,179,287.76 (equivalent to approximately HK$182,760,802.29), which was determined after arm's length negotiation between the parties with reference to the prevailing market practice. The lease period is for 3 years.

Shanghai Dazhong Public Utilities (Group) Co., Ltd. (the "Company") was established in the People's Republic of China (the "PRC") on 1 January 1992 as a joint stock limited liability company. On 4 March 1993, the Company was listed on the Shanghai Stock Exchange. Its registered office and the principal place of business activities is located at No. 518, Shang Cheng Road, Pudong New District, Shanghai, the PRC and 1515 Zhongshan Road West, Shanghai, the PRC respectively.

The Company's shares were listed on the Main Board of The Stock Exchange of Hong Kong Limited (the

The unaudited consolidated interim financial statements have been reviewed by the audit committee of the Company. It was authorised for issue on 31 August 2018.

The Group had net current liabilities of approximately RMB2,000,020,000 as at 30 June 2018. The Group meets its day-to-day work capital requirements through its bank borrowings. Its forecasts and projections, taking account of reasonably possible changes in trading performance, show that the Group should be able to operate within the level of its current banking facilities. The directors have a reasonable expectation that the Group has adequate financial resources to continue in operational existence for the foreseeable future, and therefore are of the view that it is appropriate to adopt the going concern basis in preparing the unaudited condensed consolidated financial statements. Further information on the Group's bank borrowings is set out in note 25.

(a) Overview

The IASB has issued a number of new IFRSs and amendments to IFRSs that are first effective for the current accounting period. Of these, the following development is relevant to the Group's financial statements:

- IFRS 9, Financial instruments
- IFRS 15, Revenue from contracts with customers
- IFRIC 22, Foreign currency transactions and advance consideration

The Group has not applied any new standard or interpretation that is not yet effective for the current accounting period, except for the amendments to IFRS 9, Prepayment features with negative compensation which have been adopted at the same time as IFRS 9.

The Group has been impacted by IFRS 9 in relation to classification of financial assets and measurement of credit losses, and impacted by IFRS 15 in relation to timing of revenue recognition, capitalisation of contract costs, significant financing benefit obtained from customers and presentation of contract assets and contract liabilities. Details of the changes in accounting policies are discussed in note 2(b) for IFRS 9 and note 2(c) for IFRS 15.

(a) Overview (Continued)

Under the transition methods chosen, the Group recognises cumulative effect of the initial application of IFRS 9 and IFRS 15 as an adjustment to the opening balance of equity at 1 January 2018. Comparative information is not restated. The following table gives a summary of the opening balance adjustments recognised for each line item in the consolidated statement of financial position that has been impacted by IFRS 9 and/or IFRS 15:

Notes:

(i) Due to the initial application of IFRS 9, the expected loss of lease receivable RMB13,242,000 was deducted from the carrying amount of lease receivable as at 1 January 2018.

(ii) Under IAS 39, equity securities not held for trading were classified as available-for-sale financial assets. These equity securities are classified as FVTPL under IFRS 9, unless they are eligible for and designated as FVTOCI by the Group. At 1 January 2018, the Group designated certain investments as FVTOCI (non-recycling), as the investments are held for the strategy of long term holding.

(iii) Under IAS 39, investment in bonds and funds were classified as available-for-sale financial assets. They are classified as FVTPL under IFRS 9.

(iv) Trading securities were classified as financial assets as FVTPL under IAS 39. These assets continue to be measured at FVTPL under IFRS 9.

The measurement categories for all financial liabilities remain the same. The carrying amounts for all financial liabilities (including financial guarantee contracts) at 1 January 2018 have not been impacted by the initial application of IFRS 9. The Group did not designate or de-designate any financial liability at FVTPL at 1 January 2018.

(b) IFRS 9, Financial instruments, including the amendments to IFRS 9 (Continued)

(ii) Credit losses

IFRS 9 replaces the "incurred loss" model in IAS 39 with the expected credit losses ("ECL") model. The ECL model requires an ongoing measurement of credit risk associated with a financial asset and therefore recognises ECLs earlier than under the "incurred loss" accounting model in IAS 39.

The Group applies the new ECL model to the following items:

– financial assets measured at amortised cost (including cash and cash equivalents, trade and other receivables and loans to associates);

– contract assets as defined in IFRS 15 (see note 2(c));

– debt securities measured at FVTOCI (recycling);

– lease receivables;

– financial guarantee contracts issued (see note 2(b)(i)); and

– loan commitments issued, which are not measured at FVTPL4 5.

Financial assets measured at fair value, including units in bond funds, equity securities measured at FVTPL, equity securities designated at FVTOCI (non-recycling) and derivative financial assets, are not subject to the ECL assessment.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all expected cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive).

For undrawn loan commitments, expected cash shortfalls are measured as the difference between (i) the contractual cash flows that would be due to the Group if the holder of the loan commitment draws down on the loan and (ii) the cash flows that the Group expects to receive if the loan is drawn down.

(b) IFRS 9, Financial instruments, including the amendments to IFRS 9 (Continued)

(ii) Credit losses (Continued)

Measurement of ECLs (Continued)

The expected cash shortfalls are discounted using the following discount rates where the effect of discounting is material:

- fixed-rate financial assets, trade and other receivables and contract assets: effective interest rate determined at initial recognition or an approximation thereof;
- variable-rate financial assets: current effective interest rate;
- lease receivables: discount rate used in the measurement of the lease receivable;
- loan commitments: current risk-free rate adjusted for risks specific to the cash flows.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

In measuring ECLs, the Group takes into account reasonable and supportable information that is available without undue cost or effort. This includes information about past events, current conditions and forecasts of future economic conditions. ECLs are measured on either of the following bases:

- 12-month ECLs: these are losses that are expected to result from possible default events within the 12 months after the reporting date; and
- lifetime ECLs: these are losses that are expected to result from all possible default events over the expected lives of the items to which the ECL model applies. Loss allowances for trade receivables, lease receivables and contract assets are always measured at an amount equal to lifetime ECLs. ECLs on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors and an assessment of both the current and forecast general economic conditions at the reporting date.

For all other financial instruments (including loan commitments issued), the Group recognises a loss allowance equal to 12-month ECLs unless there has been a significant increase in credit risk of the financial instrument since initial recognition, in which case the loss allowance is measured at an amount equal to lifetime ECLs.

Basis of calculation of interest income on credit-impaired financial assets

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit-impaired, in which case interest income is calculated based on the amortised cost (i.e. the gross carrying amount less loss allowance) of the financial asset. At each reporting date, the Group assesses whether a financial asset is credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable events:

– significant financial difficulties of the debtor;

– a breach of contract, such as a default or delinquency in interest or principal payments;

– it becoming probable that the borrower will enter into bankruptcy or other financial reorganisation;

– significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor; or

– the disappearance of an active market for a security because of financial difficulties of the issuer.

Write-off policy

The gross carrying amount of a financial asset, lease receivable or contract asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off.

Opening balance adjustment

As a result of this change in accounting policy, the Group has recognised additional ECLs amounting to approximately RMB13,242,000, which was offset by deferred tax of approximately RMB3,311,000 and share by non-controlling interest of RMB1,986,000 at 1 January 2018.

(iii) Transition

The Group has applied the transitional provision in IFRS 9 such that IFRS 9 was generally adopted without restating comparative information. The reclassifications and the adjustments arising from the new ECLs rules are therefore not reflected in the statement of financial position as at 31 December 2017, but are recognised in the statement of financial position on 1 January 2018. This mean that differences in the carrying amounts of financial assets and financial liabilities resulting from the adoption of IFRS 9 are recognised in retained earnings and reserves as at 1 January 2018. Accordingly, the information presented for 2017 does not reflect the requirements of IFRS 9 but rather those of IAS 39.

The following assessments have been made on the basis of the facts and circumstances that existed at the date of initial application of IFRS 9 (the "DIA"):

(c) IFRS 15, Revenue from contracts with customers

IFRS 15 establishes a comprehensive framework for recognising revenue and some costs from contracts with customers. IFRS 15 replaces IAS 18, Revenue, which covered revenue arising from sale of goods and rendering of services, and IAS 11, Construction contracts, which specified the accounting for construction contracts.

The Group has elected to use the cumulative effect transition method and has recognised the cumulative effect of initial application as an adjustment to the opening balance of equity at 1 January 2018. Therefore, comparative information has not been restated and continues to be reported under IAS 11 and IAS 18. As allowed by IFRS 15, the Group has applied the new requirements only to contracts that were not completed before 1 January 2018.

There was no related tax impact of transition to IFRS 15 on retained earnings at 1 January 2018.

For the six months ended 30 June 2018

(c) IFRS 15, Revenue from contracts with customers (Continued)

(i) Timing of revenue recognition (Continued)

The adoption of IFRS 15 does not have a significant impact on recognized revenue from construction contracts.

(ii) Significant financing component

IFRS 15 requires an entity to adjust the transaction price for the time value of money when a contract contains a significant financing component, regardless of whether the payments from customers are received significantly in advance of revenue recognition or significantly deferred.

Previously, the Group only applied such a policy when payments were significantly deferred, which was not common in the Group's arrangements with its customers. The Group did not have payments received in advance.

(iii) Presentation of contract assets and liabilities

Under IFRS 15, a receivable is recognised only if the Group has an unconditional right to consideration. If the Group recognises the related revenue before being unconditionally entitled to the consideration for the promised goods and services in the contract, then the entitlement to consideration is classified as a contract asset. Similarly, a contract liability, rather than a payable, is recognised when a customer pays consideration, or is contractually required to pay consideration and the amount is already due, before the Group recognises the related revenue. For a single contract with the customer, either a net contract asset or

(d) IFRIC 22, Foreign currency transactions and advance consideration

This interpretation provides guidance on determining "the date of the transaction" for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it) arising from a transaction in which an entity receives or pays advance consideration in a foreign currency.

The Interpretation clarifies that "the date of the transaction" is the date on initial recognition of the non-monetary asset or liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance of recognising the related item, the date of the transaction for each payment or receipt should be determined in this way. The adoption of IFRIC 22 does not have any material impact on the financial position and the financial result of the Group.

The Group determines its operating segment based on the reports reviewed by the Group's chief operating decision maker, which are the Company's executive directors that are used to make strategic decisions.

The Group has six reportable segments. The segments are managed separately as each business offers different products and services and requires different business strategies. The following summary describes the operations in each of the Group's reportable segments:

Notes:

1. The English names of the associates registered in the PRC represents the best efforts made by management of the Company to translate their Chinese names as they do not have official English names.

2. During the period, the Group held, directly or indirectly through its subsidiaries, less than 20% of the voting rights of these entities. Nevertheless, the directors concluded that the Group has significant influence over these entities and these entities are therefore accounted for as associates using equity method. Please refer to note 3(a) for basis of conclusion.

3. During the period, the Group acquired additional equity interests of 0.06% (2017: 0.95%) in Dazhong Transportation.

4. During the year ended 31 December 2017, the Company entered to a Partnership agreement to set up a fund for investing purpose, in which the Company held 60.24% equity interest of the partnership fund. However, Limited Partner is restricted
